

Chorus Activities

During the days ahead, please spend some time working on the skills you have learned in chorus.

Do these every other day:

1. Sing for 30 minutes every day
 - Spend 15 minutes practicing memorizing your choir songs from class
 - Spend 15 minutes singing any song you like
2. Do your stretches for 15 minutes
3. Do breathing exercises for 5 minutes

Pick one of these projects a week to work on (about 10 minutes a day):

1. Find (or write) a poem and write a melody for a verse
 - Record yourself singing 4 lines of the poem
2. Write lyrics to a song
 - a.) Write new lyrics and your own song
 - or
 - b.) Write new lyrics to a song that already exists (which is called a parody)
3. Create album artwork for a song
 - Using a song from class or using a song you listen to, make a wordless picture that represents the song
4. Interview a relative or someone in your house that is older than you. Ask them the following questions about music and then write them down:
 - What is their favorite song?
 - Who is their favorite artist or band?
 - What is their favorite genre?
 - Do they have a favorite memory of getting music as a kid?
